ASIAN SPIRITS THROUGH THE AGES

Asian spirits such as sake, shōchū, umeshu, and soju have been popular for centuries in their home countries. Sake, also spelled saké, is an alcoholic beverage made by fermenting rice that has been polished to remove the bran. Shōchū is the most popular Japanese spirit that has been produced since the 16th century. It is distilled from fermented koji mold and various basic ingredients such as barley, sweet potatoes, rice, buckwheat, brown sugar, as well as sesame, chestnuts, carrots, or perilla leaves. Umeshu is a Japanese liqueur made by macerating sugar and ume plums in alcohol. Korean soju is distilled from fermented rice, or optionally wheat, barley, sweet potatoes, or tapioca.

Aperitifs

LIGHT AND REFRESHING

For those who have never indulged in this sort of drink, here are a few basics: An aperitif (the word comes from the Latin aperire, “to open”) is a light, most often dry and modestly alcoholic beverage meant to spark the appetite without overwhelming the senses. And while an aperitif may be as simple as a glass of dry white wine or Champagne, a true aperitif, the kind that we love, has a little more flair, more flavor, more color and yes, a bit more sophistication.

DRINKS

IMPOSSIBLY CRAFTED NON-ALCOHOLIC SPIRITS

They say it is bad luck to toast with an empty glass or to toast without taking a sip to seal the deal. But if you've chosen not to drink alcohol, raising a glass with plain water or club soda doesn't feel quite so celebratory — and what's a wedding without a few toasts? At Cora Cora, we collaborated with Lyre's to create a bespoke selection of non-alcoholic cocktails. DISTILLED

Spirits

DISTILLED FRUITS

Distilled spirits, refers to an alcoholic beverage that is obtained from the distillation of grapes and other fermented fruits. The first distillation is known as eau-de-vie, but after a second run through the process a finer, silkier, more elegant spirit is produced which is recognized as a top end offering such as cognac, brandy, and grappa.

FRANCE

HENNESSY VS COGNAC

Vodka

POTATO, RYE & WHEAT

Produced by the fermentation of a range of different starches. The major producers of vodka are Russia, Poland, and Sweden. This 'aqua vitae' or 'water of life' as is known by its Latin name is the most commonly used spirit. Though it's traditionally drunk "neat", its odorless, colorless profile makes it the preferred choice for cocktail bars and it is known as a ladies-choice spirit.

Rum

MALAISES & SUGAR CANE

The production first started in the sugar cane fields of the Caribbean and moved into the drier regions of south America in the 1700's. These two distinctly different climatic regions produce two very different profiles of rum. One being more tropical and the other being crisper and dry. Known as 'the grog of the pirates' rum in its most basic form was a staple drink of choice on the seas and was believed to be a remedy in warding off scurvy.
